

Photos of Summer Projects

This summer, the City of West Linn is pursuing an aggressive list of projects that are designed to make our City a better place to live, work, play, and do business. All projects are funded by your utility fees, street maintenance fees, or park maintenance fees. Regular capital projects protect the City's investment in the street, sewer, storm water, and parks infrastructure. Many of these projects will cause some driving delays or disruptions; however, the City of West Linn believes that these temporary delays are worthwhile as we pursue the most cost effective and efficient ways to invest in the City infrastructure to improve the livability of our community.

New photos showing many of the completed street projects are now available online - see below
